

Last week we had a new Tesla X100D roll in with their Bowlus Road Chief reporting an average recent trip range of 200 miles when towing with their Endless Highways®. Another couple recently enjoyed an epic cross-country adventure with a 90D, along with three standard poodles and their On The Road Edition. With the expanding network of charging stations, you can now hit the road with confidence. So, is there anything else you need to know before you order your Road Chief or your Tesla X and head off never to fuel at a gas station again?

The answer is a resounding yes! We have consulted a few of our Tesla X owners who have logged thousands—yes that’s right, thousands—of miles towing their Bowlus Road Chief. We asked for their “insider” tips on towing, charging and camping. Even more importantly (and we thank them), they wanted to share why the Bowlus Road Chief was the right decision for them.

So, in honor of our Tesla X adventurers this week, we’ve added a special link called “Emission Free Camping Adventures” to our website. It’s a quick start guide to real experiences along with their “hacks” to get you started.

We think Hawley Bowlus, who harnessed the wind for many of his amazing flight machines, would be honored to know that Road Chiefs are being towed coast to coast by a growing group of fellow eco-adventurers.

Here’s to the next gen of camping,  
Geneva Long  
Bowlus Road Chief

P.S. Here is the link to “Emission Free Camping Adventures” to get your started.
